

Checklist for Connecting WhatsApp Business API

1. You must have a website. At minimum, a one-page landing page that clearly shows what your company does. The website footer must include the legal entity name and registration number (check example).

2. Your Business Manager must have all company information fully completed.

Business details

Edit

Legal business name

Sport Shop LTD

Address

9 Philip Club Lake Lizzie BH11 9NE
London, London 115172
United Kingdom

Business phone

+390697635310

Website

<https://www.kwiksim.co.uk/>

Tax ID

16598413

3. Not required, but it is recommended to verify your website domain.

Brand safety and suitability => Domains => Add

The screenshot displays the 'Domains' management page in the Meta Business Suite. On the left, a navigation menu includes 'Threads accounts', 'Data Sources', 'Requests', 'Brand safety and suit...', 'Domains' (highlighted with a red arrow), 'Publisher block lists', 'Integrations', 'Billing & payments', 'Meta Verified', 'News Pages', 'Partnership Ads Hub', and 'Security Center'. The main content area shows a table of domains with the following entry:

Name
</> www.kwiksim.co.uk Verified

Below the table, there are buttons for 'Assign partner' and 'Connect assets'. A section titled 'Partners' shows '0 partners are assigned to this www.kwiksim.co.uk domain' and includes a search bar labeled 'Search by name or ID'. At the bottom, there is a visual representation of partner avatars.

These simple steps will help you connect your number to the WhatsApp Business API without encountering any difficulties during the setup process.
