

Version 3 Public Preview | Developer Documentation

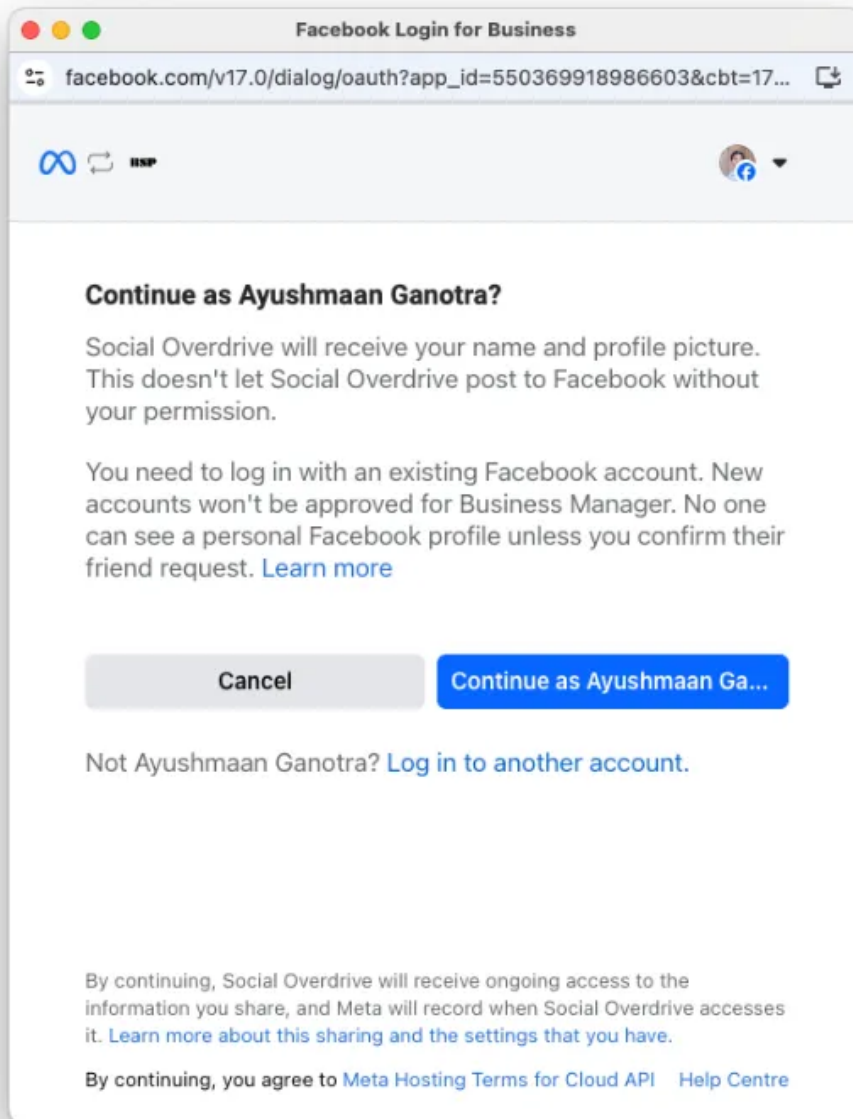

Version 3 Public Preview

Updated: Nov 4, 2025

We are updating the UI for Embedded Signup. You can get a preview of what it looks like by enabling v3-public-preview. The new version will give partners a preview on what's to come for Embedded Signup in the near future. Functionality between v3-public-preview and v3 are identical; the key difference is a simplified UI on v3-public-preview.

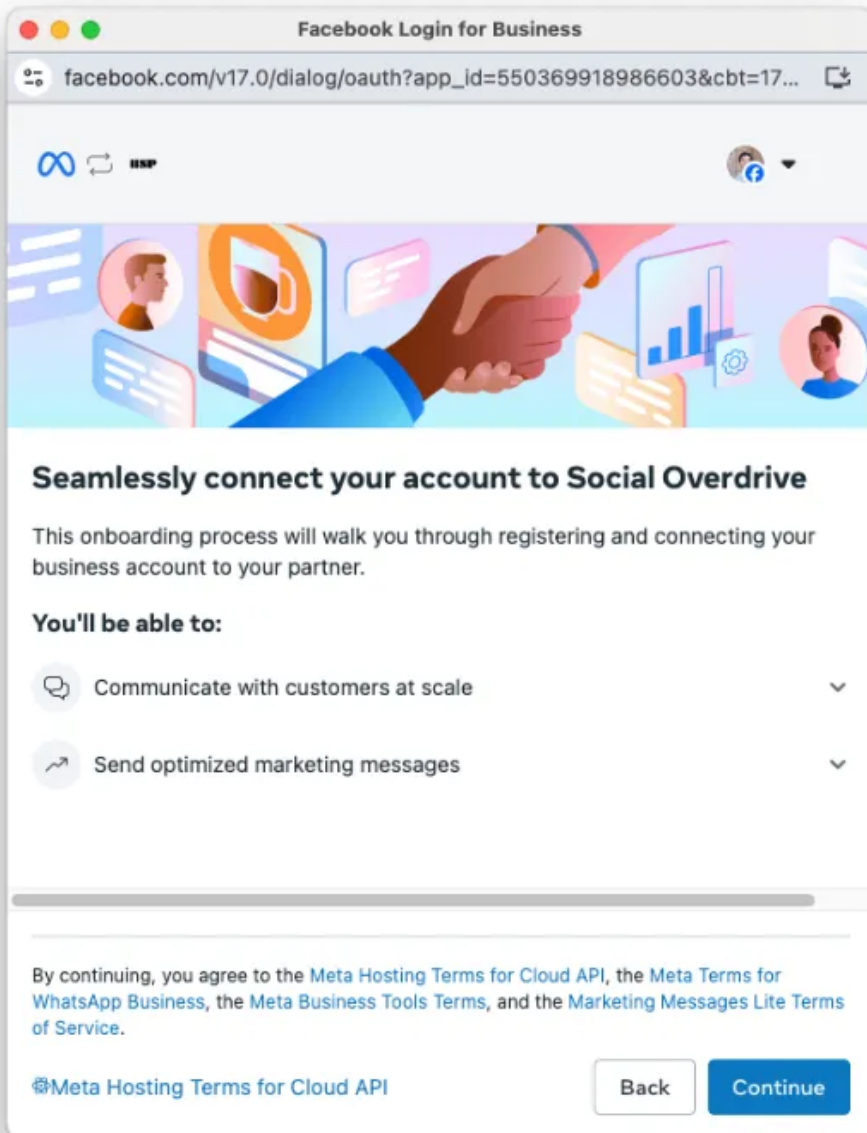

Authentication screen

This screen authenticates business customers using their Facebook or Meta Business Suite credentials.

Authorization screen

This screen describes the data the business customer will be permitting your app to access.

Business Asset Selection Screen

This screen gives customers the option to select existing business assets such as a Meta business portfolio and WhatsApp Business Account.

Users also have the option to create new assets if they have not reached their portfolio limit.

The screenshot shows a web browser window titled "Facebook Login for Business". The address bar displays the URL: `facebook.com/v17.0/dialog/oauth?app_id=550369918986603&cbt=17...`. The page features a sidebar with four circular navigation options; the first one is selected and highlighted in blue. The main content area is titled "Select your business assets" with the subtitle "You can use existing assets or create new ones." Below this, there are two sections: "Business portfolio" and "WhatsApp Business account", each with a dropdown menu. The "Business portfolio" dropdown currently shows "Create a business portfolio". The "WhatsApp Business account" dropdown currently shows "Create a WhatsApp Business account". At the bottom of the page, there is a disclaimer: "By creating a new WhatsApp Business account and Business account, you agree to the [Meta Terms for WhatsApp Business](#), the [Meta Commercial Terms](#), and the [Meta Terms of Service](#)." Below the disclaimer is a link to "Meta Hosting Terms for Cloud API". At the bottom right, there are two buttons: "Back" and "Next".

Phone number addition screen

This screen allows the business customer to enter a new business phone number to associate with their WhatsApp Business Account.

It also allows the customer to choose how they wish to receive their verification code, which they will need to provide in the next step.

If you are providing phone numbers to your customers, you will have to deliver these codes to your customers, or provide pre-verified numbers instead.

Add your WhatsApp phone number

Choose how you want to be identified when sending messages. [About existing numbers](#)

☐ Use a display name only ⓘ
Send messages on WhatsApp where people only see a display name in the chat.

☒ Use a new or existing WhatsApp number
Verification may be required.

☐ Add a phone number later
You won't be able to send messages until you attach a phone number to your WhatsApp Business Account. Visit [Business Settings](#) to add a phone number.

Phone number

Add a new WhatsApp number

US +1

[\[FB-only\] Get test number](#)

You'll receive a code to verify this number.

Choose how you would like to verify your number
If you are using a landline number, choose phone call.

Phone number verification screen

This screen allows the business customer to verify ownership of the business phone number they entered in the previous step.

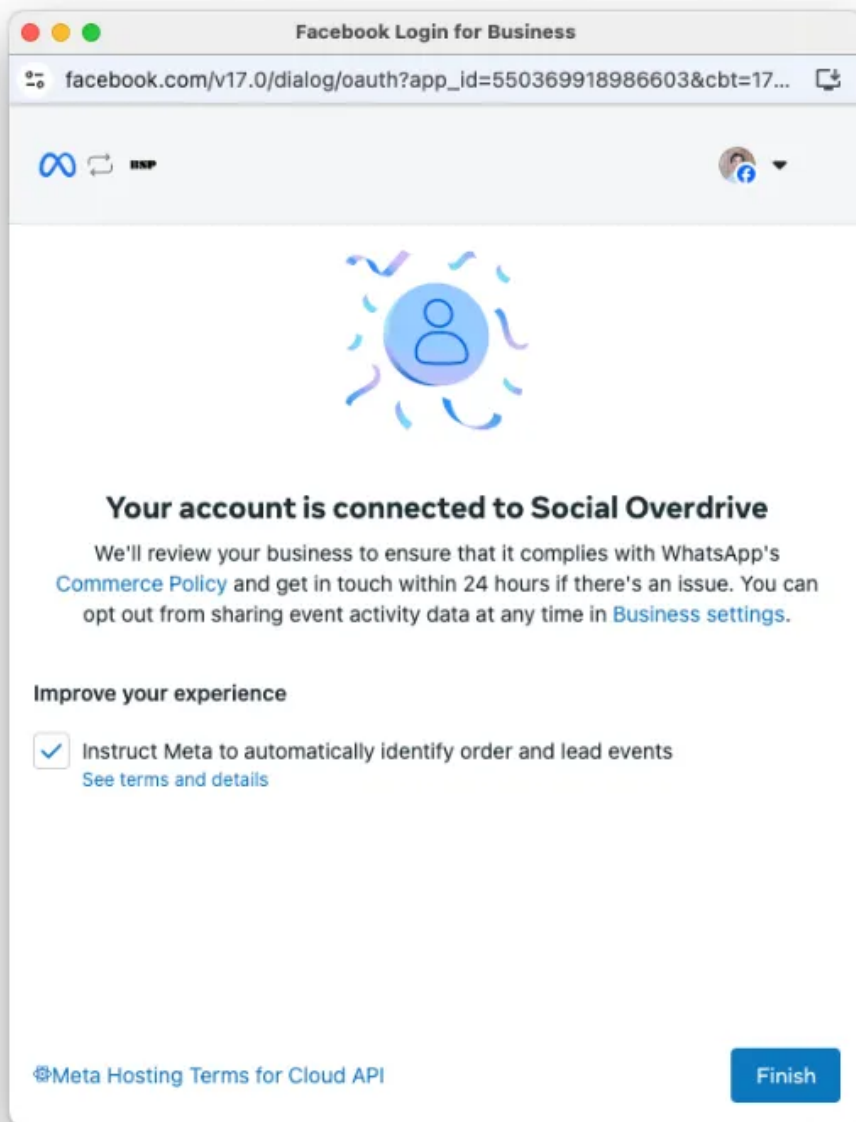

Permissions review screen

This screen provides a summary of the permissions the business customer will be granting to your app.

Success screen

This screen indicates that we successfully created and associated all of the business customer's assets (business portfolio, WABA, phone number display profile, and business phone number). When the customer clicks Finish, a message event will be triggered, containing the customer's WABA ID and business phone number ID, which you must then use to onboard the customer to the platform.
