

Versions | Developer Documentation

Versions

Updated: Dec 11, 2025

The latest Embedded Signup Version is: v4

This guide provides an overview on versioning in Embedded Signup. The versioning cadence will align with Graph API. The versions are not exclusive, partners can gradually roll out a new version of ES to reduce risk. The Embedded Signup version is determined inside of the **extras object** of the implementation code.

Note: The refreshed UI, currently available in the public preview, will be rolled out to all versions of Embedded Signup in early September.

Available ES Versions

Version	Date Introduced	Available Until
v4	October 8th, 2025	TBD
v3-public-preview	August 14, 2025	October, 2026
v2-public-preview	August 14, 2025	October, 2026
v3	May 29, 2025	October, 2026
v2	January 2023	October, 2026

Overview of feature availability
