Version

API for retrieving WhatsApp Account Number details and configuration information. This endpoint allows businesses to retrieve comprehensive information about their WhatsApp Account Numbers, including status, verification details, and configuration settings.

---

### GET /{Version}/{WhatsApp-Account- Number-ID}

Retrieve comprehensive details about a WhatsApp Account Number, including its current status, verification information, quality rating, and configuration settings.

Use Cases:

- Monitor account number status and quality rating
- Verify account number configuration before messaging operations
- Check verification and approval status
- Retrieve display name and business profile information

Rate Limiting:

Standard Graph API rate limits apply. Use appropriate retry logic with exponential backoff.

Caching:

Account number details can be cached for short periods, but status information may change frequently. Implement appropriate cache invalidation strategies.
