

WhatsApp Business Bot - Bot Details API | Developer Documentation

WhatsApp Business Bot - Bot Details API

Copy for LLM

[View as Markdown](#)

Version

This endpoint allows developers to retrieve comprehensive information about their WhatsApp Business Bot, including prompts, commands, and welcome message settings. This is essential for managing bot configuration and understanding current bot state.

GET /{Version}/{WABA-Bot-ID}

Retrieve comprehensive details about a WhatsApp Business Bot, including its prompts, commands, and welcome message configuration.

Use Cases:

Retrieve bot configuration and automated response settings

Monitor available bot commands and their descriptions

Check welcome message enablement status

Validate bot state before implementing automation

Audit bot configuration for business compliance

Rate Limiting:

Standard Graph API rate limits apply. Use appropriate retry logic with exponential backoff.

Caching:

Bot details can be cached for moderate periods, but configuration may change

when bot settings are updated. Implement appropriate cache invalidation strategies.

Request Syntax

Try it

Select language

Select status code

Header Parameters

User-Agentstring

The user agent string identifying the client software making the request.

Authorizationstring·required

Bearer token for API authentication. This should be a valid access token obtained through the appropriate OAuth flow or system user token.

Path Parameters

Versionstring·required

Graph API version to use for this request. Determines the API behavior and available features.

WABA-Bot-IDstring·required

Your WhatsApp Business Bot ID. This ID is provided when you create the bot and can be found in your Business Manager or through bot management APIs.

Query Parameters

fieldsstring

Comma-separated list of fields to include in the response. If not specified, default fields will be returned (prompts, commands, enable_welcome_message).

Available fields: id, prompts, commands, enable_welcome_message

Responses

Retrieve comprehensive details about a WhatsApp Business Bot, including its prompts, commands, and welcome message configuration.

Use Cases:

Retrieve bot configuration and automated response settings

Monitor available bot commands and their descriptions

Check welcome message enablement status

Validate bot state before implementing automation

Audit bot configuration for business compliance

Rate Limiting:

Standard Graph API rate limits apply. Use appropriate retry logic with exponential backoff.

Caching:

Bot details can be cached for moderate periods, but configuration may change when bot settings are updated. Implement appropriate cache invalidation strategies.
