

Integration Integromat.com (Make.com) with Google Sheets

In this guide, you will learn how to install our WhatsApp Business API integration in Make and send messages using a database from Google Sheets.

1. After registering with Make, you need to install our app <https://www.make.com/en/hq/app-invitation/80e6a64b2b12c4476413627b22551fb7>

Triggers

ChatArchitect.com for WhatsApp

ChatArchitect.com manages inbound WhatsApp messages, outbound session and template messages (HSM), media, and WhatsApp buttons.

You are installing application ChatArchitect.com for WhatsApp, select organizations to which you want to install the application.

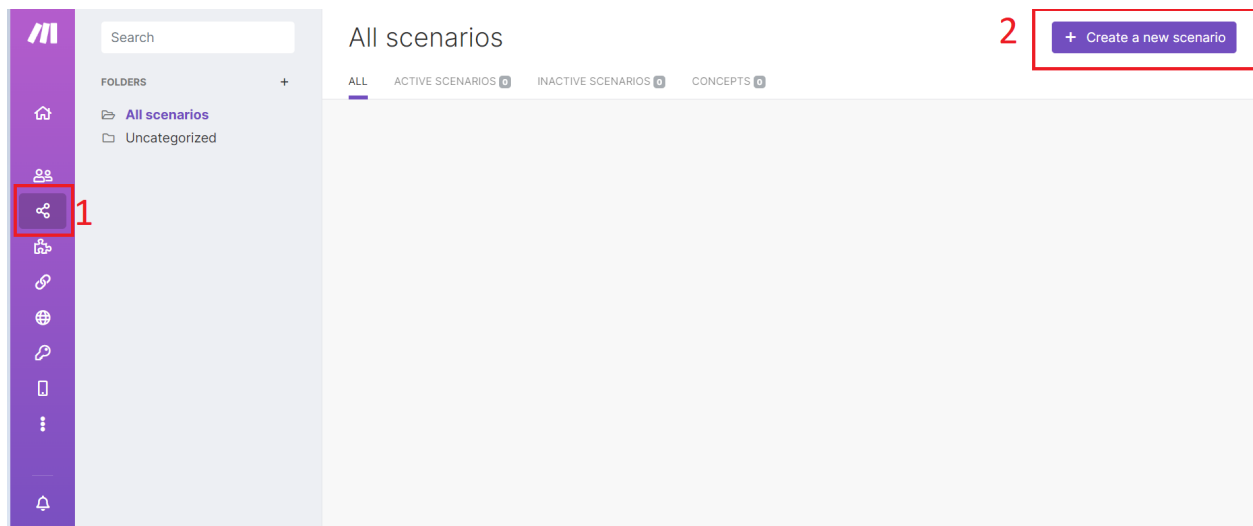

Select organizations

 Please note that you can install apps only in the organization in which you have the Admin, Owner or the App Developer role.

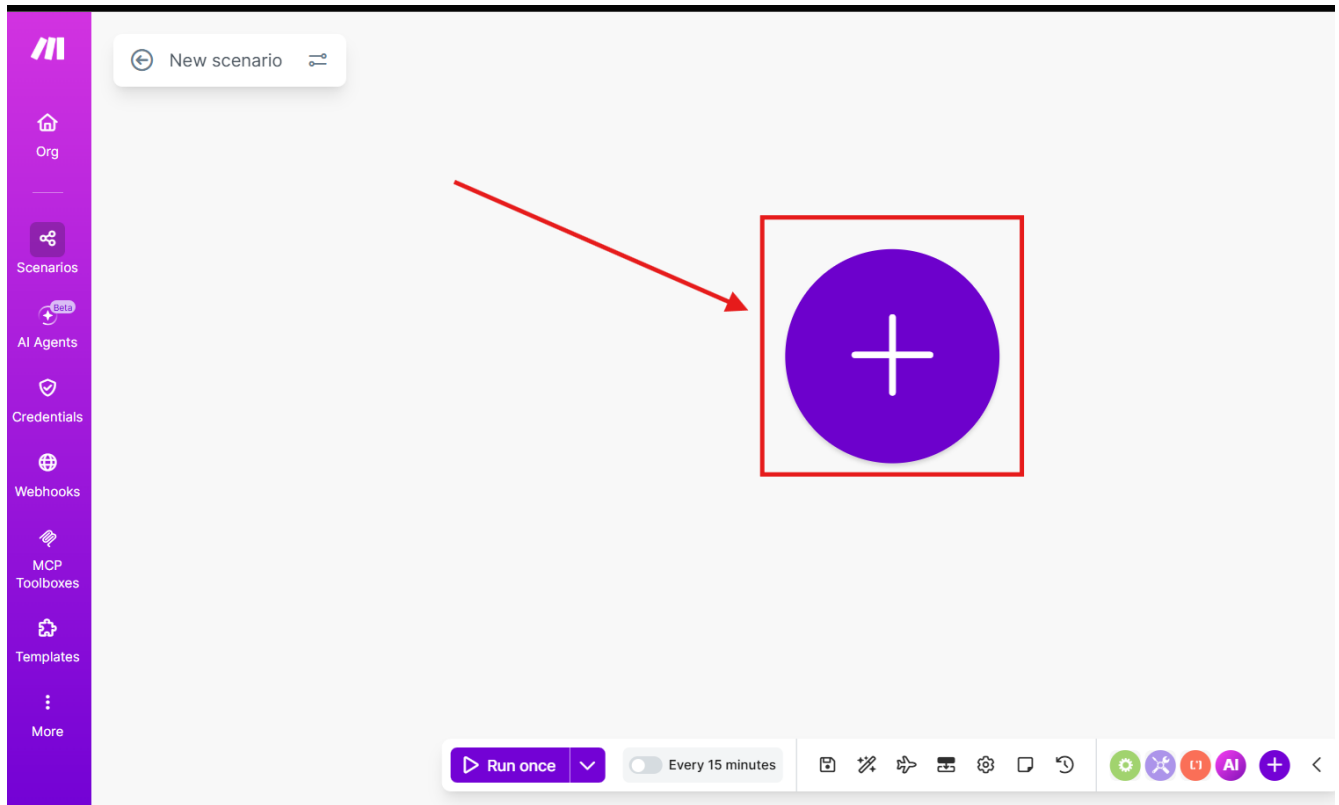

☒ My Organization

Install

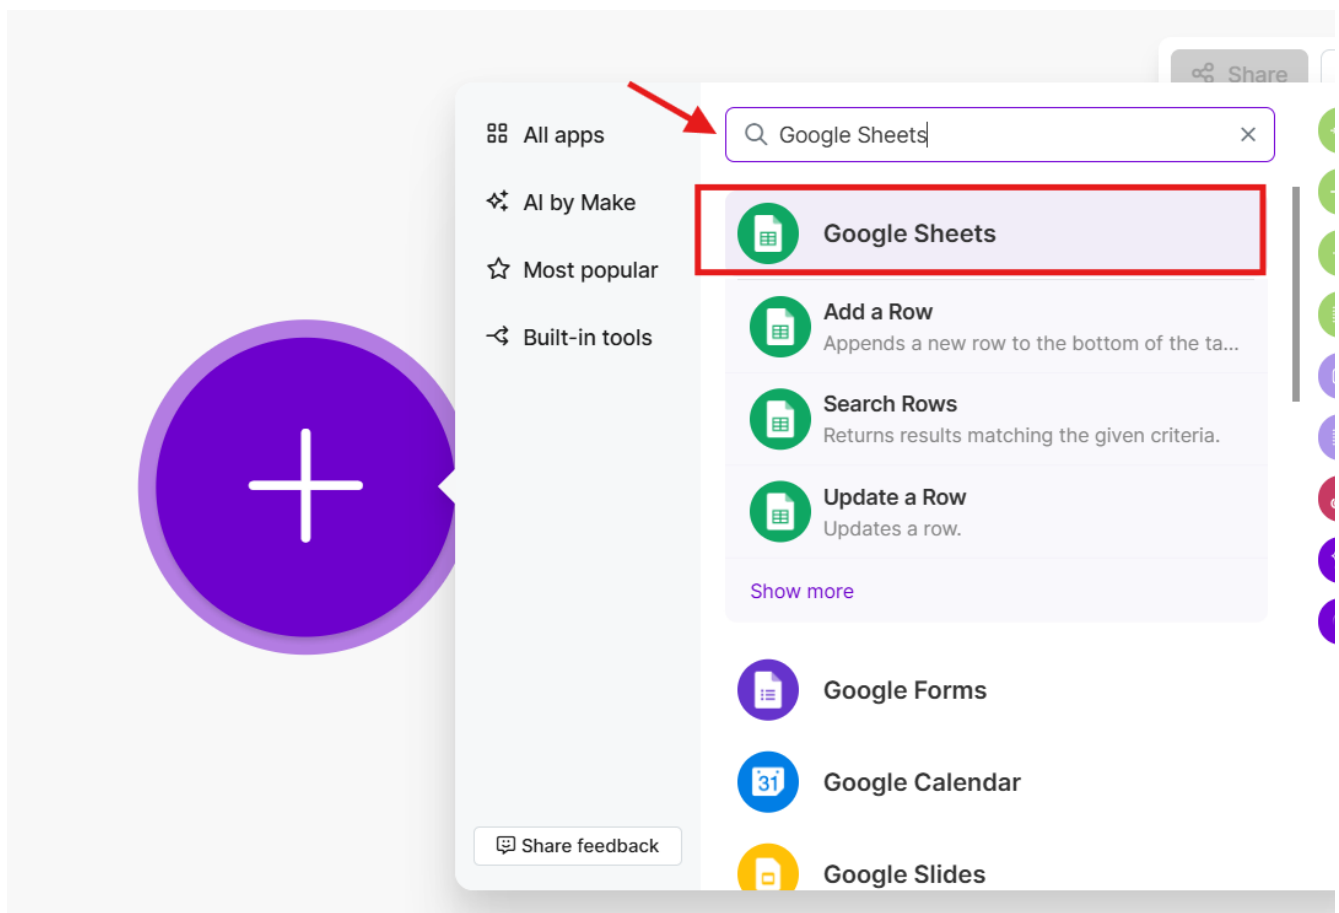

2. Then go to the "**Scenarios**" tab and click on the "+Create a new scenario" button

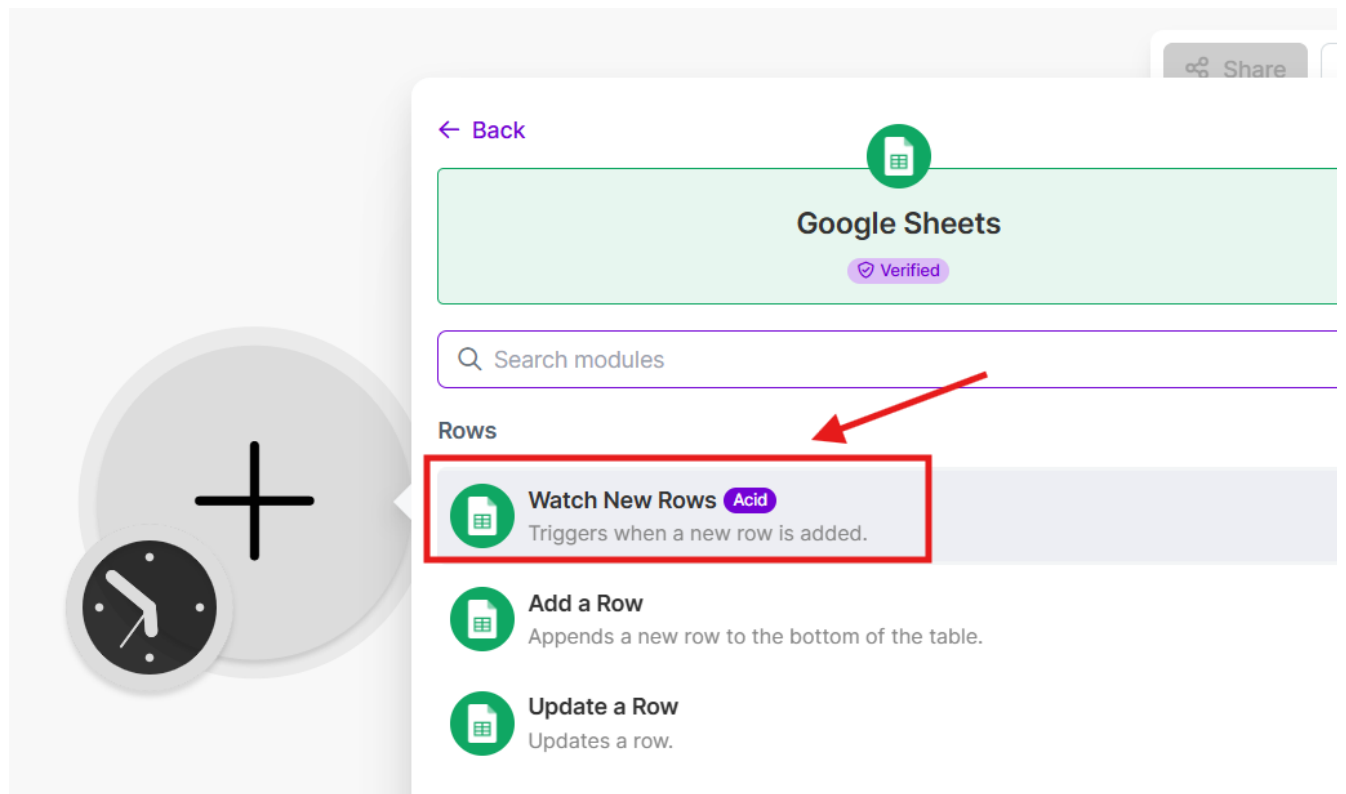

2. Press on this "**Plus**" button

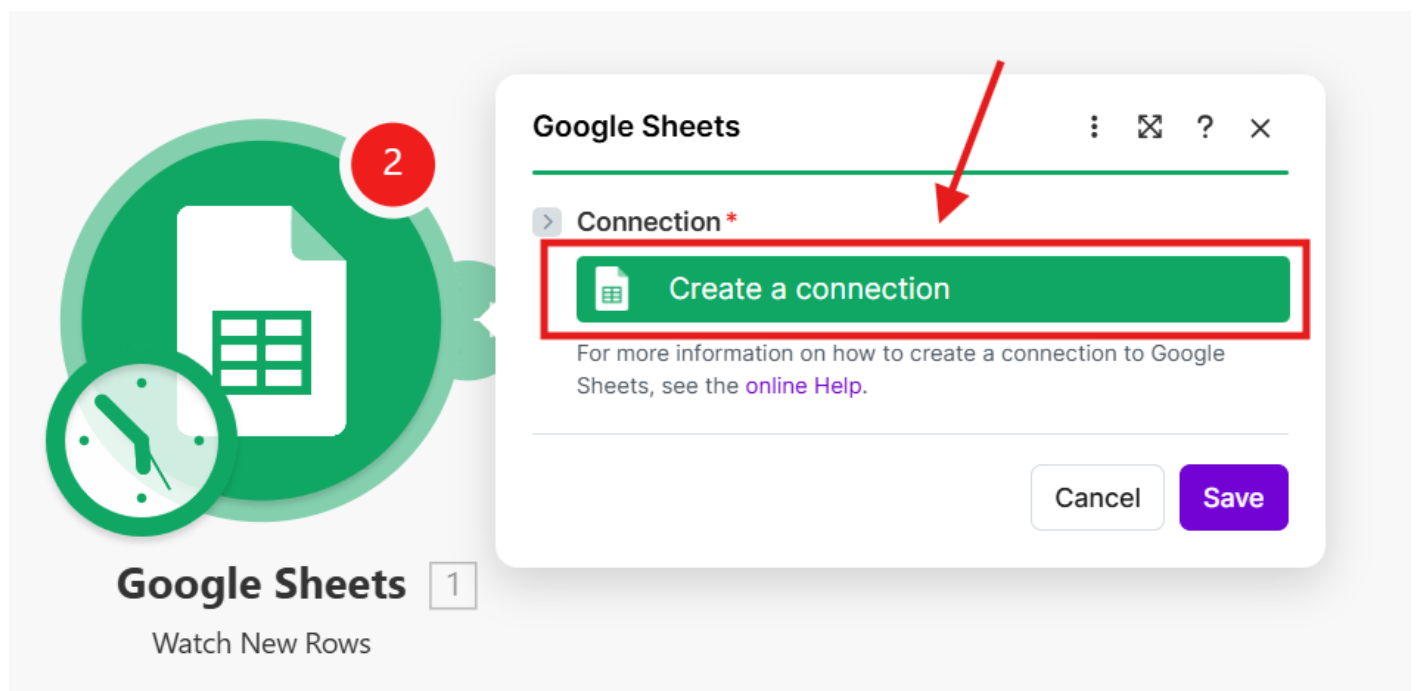

3. Search "**Google Sheets**"

4. Then choose "**Google Sheets**" and choose trigger "**Watch Rows**"

5. Add your **Google Account**

6. Choose "**Connection**"; "**Drive**"; "**Spreadsheet ID**" and "**Sheet Name**";
After that press "**Save**" button

7. Then you need to press "**Add module**" and choose our integration **ChatArchitect.com for WhatsApp** and choose "**Send a Text**"

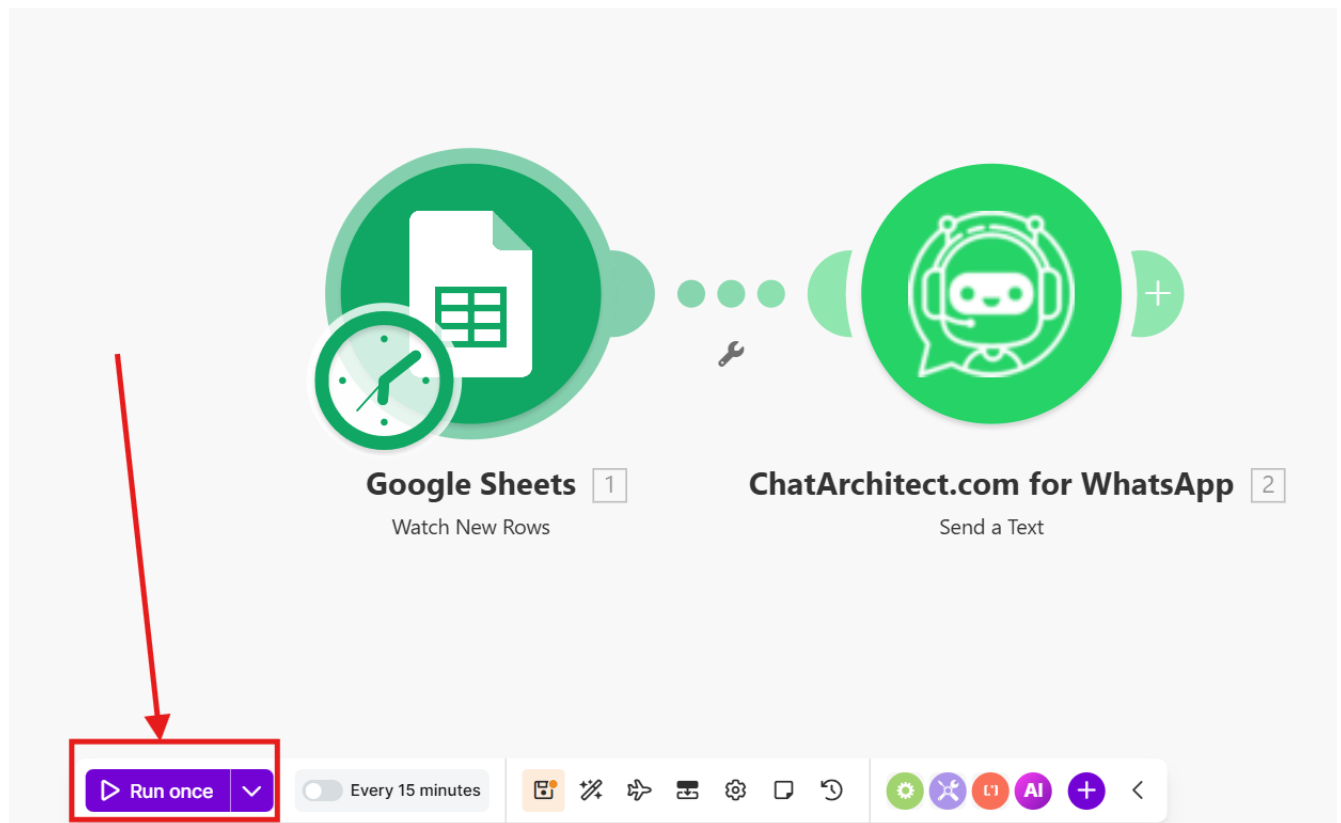

8. Select "**Create a connection**" -> add your **APP ID** and **APP SECRET**;
After that press "**Save**" button

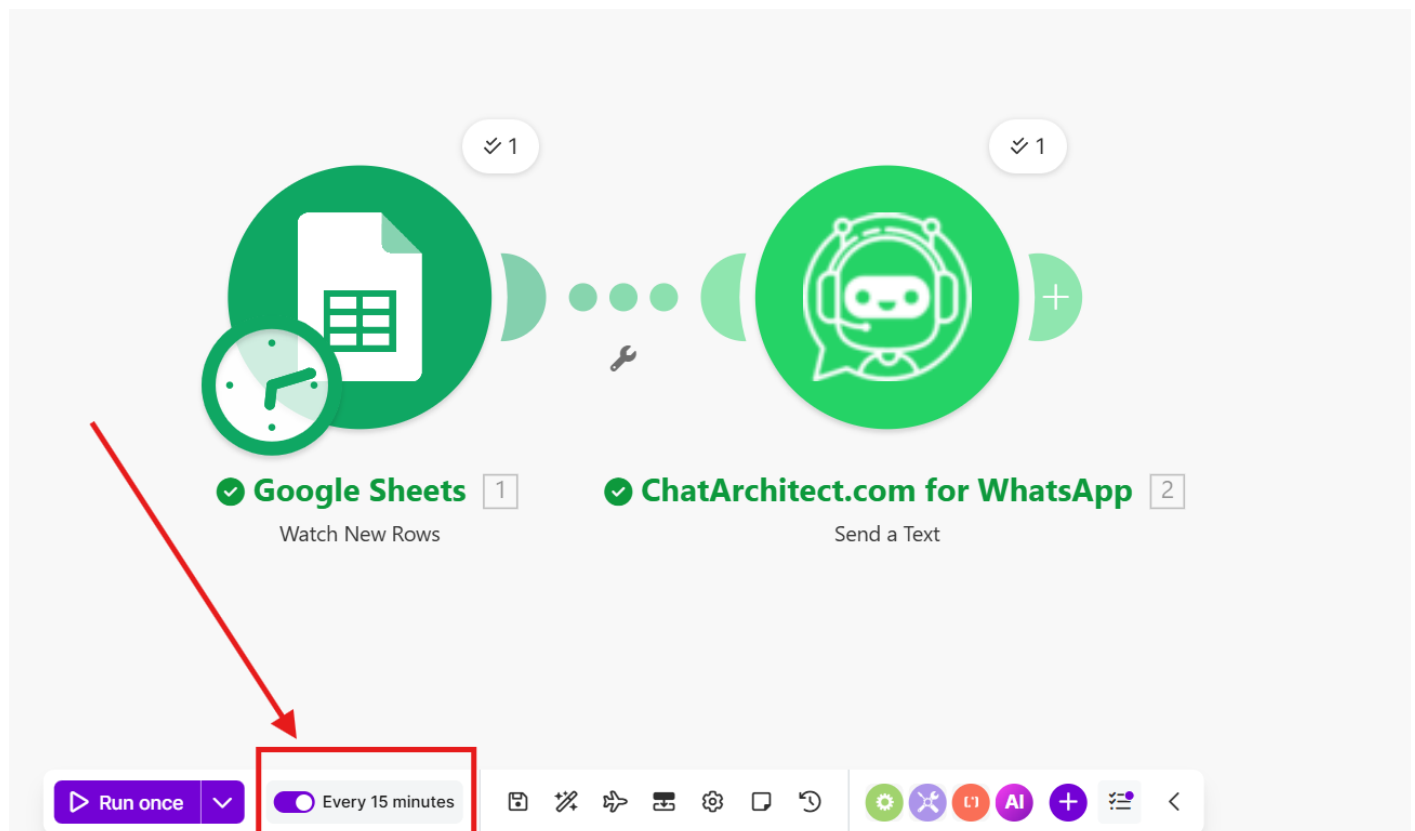

9. Choose destination from your table;
 In the text field you need to enter the **text of the template** that you want to send;
 Highly Structured Message: **Yes**
 and press "**Save**" button

10. Test your connection by using "**Run once**" button

11. If the message was successfully delivered to your test numbers, you can include "**Scheduling**" and add numbers to the table (It is important to add numbers for mailing after activating "**Scheduling**", because **Make works to add rows to the table**)
