

Sending messages from Google Sheets to WhatsApp via Albato.com

0. To connect your number and receive an access key, please write to our WhatsApp

<https://wa.me/421233221242>

Or you can fill the form on our website <https://www.chatarchitect.com/whatsapp/>

1. Select Google Sheets, Event - New Row Created, select the desired table.

A black rectangular bar containing the text '1209bf12999d4c777b02d3c0b142bb4c.png', which is a placeholder for a screenshot showing the selection of a table in Google Sheets.

2. Adding our application ChatArchitect.com, Event - Send a Text. Add your ChatArchitect account (you must enter the app id and app secret that you received after connecting)

A black rectangular bar containing the text '0b614eaac64b0b67fb53581c572fec9e.png', which is a placeholder for a screenshot showing the addition of a ChatArchitect account.

3. Specify from which column the numbers will be pulled up, in the Text field enter the text of a submitted template

A black rectangular bar containing the text '3abf15f52d784ba4b5ccd1d9cb1e47e2.png', which is a placeholder for a screenshot showing the configuration of a text field in the application.

4. After that, click on the "+" and select "Action"

A black rectangular bar containing the text '1c726158d6ebbf66effac8ef4dac8332.png', which is a placeholder for a screenshot showing the selection of an action in the application.

5. Once again select Google Sheets, Action - Update a row by number, then add the same table as in the first case.

A black rectangular bar containing the text '4988e8d196b1a402f615973310392699.png', which is a placeholder for a screenshot showing the selection of a table for the update action.

6. Then choose as in the screenshot:

1. Row number - Google Sheets: Row number
2. Column A - ChatArchitect.com for Whatsapp: Text
3. Column B - ChatArchitect.com for WhatsApp: Status

You can change the columns according to what you need.

A black rectangular bar containing the text '44b78c45d4a2820076494166cfd5d7fc.png', which is a placeholder for a screenshot showing the final configuration of columns for the WhatsApp message.

7. After that, launch Albatto; after launching, send a test message to your WABA number and check if the table has been updated.

It should look like this:
