

Sending messages via bubble.io

1. First of all, you need to add a Button

embedded-image-dxorp1xk.png

2. We add Workflow to the button (click on the button and click Start / Edit Workflow)

embedded-image-r7mbrox8.png

3. Click "Click here to add an action"

embedded-image-celewbqm.png

4. Next select "Plugins", "Install more plugins actions"

embedded-image-l2ujdoo0.png

5. Find our integration and install (you must first select all filters for the search)

embedded-image-qzyp3jra.png

6. After that, go to the "Plugins" tab, in the username field enter your APP ID, in the password field APP SECRET

embedded-image-bji4ehe9.png

7. Next, return to the "Workflow" tab, click "Click here to add an action" , "Plugins", "Send a text"

embedded-image-yj4xs5bw.png

8. After we fill in the Destination (receive) and Text fields and click the "Preview" button (top right)

embedded-image-o2zad87d.png

9. After clicking on the "Preview" button, you will be redirected to the page with the button. When pressed, the message will be sent to the entered recipient.
