# WhatsApp for HubSpot

HubSpot is a specially developed system for your business that gives you the ability to send emails, communicate directly with customers, keep track of company data.

Connecting HubSpot and ChatArchitect synchronizes your contacts and speeds up the process of interaction with the client.

After connecting, you will be able to customize your account according to your needs, as well as contact any of your clients. Follow the instructions to set everything up correctly and make it easier for yourself to interact with the program in the future.

## Installation instruction

**1.** First of all, install our application via the link (first, log in to your HubSpot account, then enter the keys that we will send you after the connection is completed)

<https://wa.chatarchitect.com/email-hubspot/>

**2.** Then enter the keys that we sent you

5. Select the desired language and template type.

Write your message with variables in the first column. For example, "Hello, our employee will answer you as soon as possible. Ticket {{1}} has been created." Variables should be in braces {{}}.

Write a sample message replacing the variables with meaningful information in the second column. For example, "Hello, our employee will answer you as soon as possible. Ticket [999TTT] has been created.". The placeholder is square brackets [].

Then click "Submit Template".

# How to improve your Template

When preparing a mailing campaign, one of the most common questions is: *How can I create an effective newsletter without risking being blocked?* In this article, we'll share practical recommendations to help you achieve that.

## Text Length

Meta recommends keeping marketing templates under 500 characters to maximize customer engagement. The optimal range is 300–500 characters. In practice, this means keeping your message concise and focused: present the essence of your offer in just a few sentences instead of overwhelming readers with a wall of text.

## Personalization with Variables

Personalization significantly improves the effectiveness of your campaigns. Using variables such as the customer's name is a simple but powerful way to make your messages feel more personal. After all, everyone appreciates being addressed directly.

## Use of Media

Adding visuals such as bright images or short videos is a proven way to increase click-through rates. High-quality media design not only attracts attention but also serves as an important driver of conversions.

## Action Buttons

Quick-reply buttons are an excellent tool for faster customer interaction. A single click is always easier than typing a response.

In addition, action buttons can redirect users directly to your website or phone number, making the communication process seamless and convenient.

## Unsubscribe Button

Meta recommends including an “Unsubscribe” button in mass-mailing templates, and we strongly support this practice. It’s much better to give customers an easy, native way to opt out than to risk complaints or negative feedback.

## Conclusion

If you want your newsletter to deliver high engagement and strong conversion rates, make sure your template includes all of the elements listed above: concise copy, personalization, engaging visuals, action buttons, and an unsubscribe option.

**Important Note:** Templates containing images or call-to-action buttons (such as a website link or phone number) can only be approved via chat with our support team: [wa.me/421233221242](https://wa.me/421233221242)
