

WhatsApp Business API for Microsoft Teams: Installation and sending the first message.

Installation guide

1. First of all you need to choose a team where do you want to use our app, press "**more options**" and after that "**manage team**"

embedded-image-jyfqbfbh.png

2. Go to the "**apps**" => "**Get more apps**"

3. Write "**ChatArchitect.com for WhatsApp**" and choose our app to add to the channel

Press to view all results

4. Select a channel and press "**Go**"
